Regular Oil and Filter Changes

Use high-quality synthetic diesel engine oil and change it every 5,000 to 7,500 miles. Regular oil changes help maintain engine health and efficiency.

Monitor and Replace the DSG Fluid

The DSG transmission requires periodic fluid changes, typically every 40,000-60,000 miles, to prevent wear and shifting issues. Use recommended VW-approved transmission fluid.

Address DPF and EGR System Maintenance

Drive at highway speeds regularly to facilitate DPF regeneration. Clean or replace EGR valves as needed to prevent clogging and maintain emission standards.

Inspect and Replace Belts and Hoses

Regularly check the timing belt, serpentine belt, and hoses for signs of wear or cracking. Early replacement prevents engine damage.

Keep the Battery and Electrical System in Check

Ensure the battery is in good condition, especially in colder climates. Check electrical connections and sensors periodically for proper operation.
